

OntoGuard Decision Authorization Packet - Public Sanitized

Latest accepted controlled proof surface - Goal 3 code-now complete, with R7, continuity, authority, custody, consequence proof, and controlled Full Seam L4 evidence.

Protected by U.S. Patent Application 19/444,521 - Track I prioritized examination granted May 2026.

Decision Authorization Summary

Trace ID	83b5bdd9-7b5f-40c1-9e34-75573e0aac54
Business domain	Wealth Management
Workflow	Pre-release investment recommendation review
Decision API	ESCALATE
Release authorized	False
Release status	WITHHELD_PENDING_REVIEW
Routed to	HUMAN_REVIEW
Business effect	Autonomous release withheld pending review.
No-bind status	NO_PROTECTED_EFFECT_FORMED
Protected effect formed	False

Goal 3 code-now implementation: COMPLETE (15/15). The current event is event-level/shadow proof. Separately, the controlled Full Seam passed 22/22 mandatory tests at L4_ROUTE_ENFORCED for the bounded controlled route. Production L5 is not asserted.

Eight-Stage Governed Transaction

1. Attempt - COMPLETE

AUTHORIZE_OR_WITHHOLD_DECISION_SUPPORT_RECOMMENDATION_RELEASE

2. Interpretation - SNAPSHOT_CAPTURED

Wealth Management Pre-release investment recommendation review governance

3. Admissibility - INADMISSIBLE_FOR_AUTONOMOUS_RELEASE_PENDING_REVIEW

Explains whether the proposed movement was admissible for autonomous release or required review.

4. Authorization - ESCALATE

Decision API result: ESCALATE

5. Release Control - WITHHELD_PENDING_REVIEW

Release authorized=False; routed_to=HUMAN_REVIEW

6. Consequence Proof - NO_PROTECTED_EFFECT_FORMED

Autonomous release was withheld before downstream protected effect formation.

7. Human Closure - PENDING

Shows whether the human-review route is open, pending, or closed by an actual reviewer outcome.

8. Learning Signal - CANDIDATE_GENERATED

Review-gated improvement candidate; no live model or policy mutation.

Persistent Intent and Governing Basis

R7 Intent Horizon asks whether the proposed action remains faithful to the immutable original mission. Governing Basis Continuity separately asks whether the conditions that make the action legitimate remain current.

R7 status	COMPUTED
Computed before decision	True
Semantic distance	0.331311
Threshold state	WARNING_THRESHOLD_EXCEEDED
Required decision effect	ALERT
Explicit prohibited boundary crossed	False
Raw embeddings exported	False
Governing basis	ESTABLISHED_CURRENT
Lawful continuation	INITIAL
Fresh decision required	True

Authority and Custody

Delegated authority	NOT_ATTACHED
Route authority	NOT_ATTACHED
Source authority	NOT_APPLICABLE
Capability authority	NOT_APPLICABLE
Evidence custody	NOT_REQUIRED
External runtime-state attestation	NOT_ATTACHED
Authority continuity	CONNECTED_ROUTE

A retrievable source is not automatically an authorized source, and a technically callable tool is not automatically an authorized capability. Positive source/capability states may satisfy prerequisites but do not independently create ALLOW.

Consequence Custody and No-Bind Proof

Consequence Custody links the exact proposed movement to its frozen governing basis, authoritative Decision API result, execution-boundary state, NO-BIND/authorization state, receipt, and manifest.

Custody status	NO_BIND_PROVEN
Decision	ESCALATE
Release status	WITHHELD_PENDING_REVIEW
Decision input hash	sha256:59ff5dbcee64bf...f268aada
Governing basis hash	sha256:e4c6c302a8812b...d3783641
Execution-boundary hash	sha256:8c1bd9bd6cb3ca...9b542597
NO-BIND/grant hash	sha256:a5c4b9b44a32e9...8b3ab637
Receipt binding	sha256:a31558dae21232...057d7d9c
Manifest binding	sha256:1533a711c75072...bca7a439
Bind-time status	LIMITATION_NOT_ENFORCEMENT_CAPABLE

Current Event vs Controlled Fixture

Current event maturity	EVENT_GOVERNED_ROUTE_COMPLETENESS_NOT_ASSERTED
Current event route maturity	L1_PLUS_EVENT_GOVERNED_NO_BIND_PARTIAL
Current event production enforcement	False
Current event production non-bypassability	False
Controlled Full Seam	PASS
Controlled fixture maturity	L4_ROUTE_ENFORCED
Controlled tests	22/22 passed
Controlled fixture production enforcement asserted	False

Current-event governance proof is separate from controlled-harness route maturity; neither is production deployment proof.

Controlled Full Seam - Public Test Matrix

The following records are controlled-inline harness evidence. They establish bounded controlled-route behavior only.

ID	Failure / attack mode	Decision	Observed	Commits	Effect	Pass
T-01	VALID_EXACT_ALLOW_GRANT	ALLOW	COMMITTED	1	True	True
T-02	BLOCK_RESULT	BLOCK	REFUSED	0	False	True
T-03	ESCALATE_RESULT	ESCALATE	REFUSED	0	False	True
T-04	DECISION_TIMEOUT	ESCALATE	REFUSED	0	False	True
T-05	INTERNAL_DEPENDENCY_ERROR	ESCALATE	REFUSED	0	False	True
T-06	MISSING_GRANT	ALLOW	REFUSED	0	False	True
T-07	MALFORMED_TOKEN	ALLOW	REFUSED	0	False	True
T-11	WRONG_TENANT	ALLOW	REFUSED	0	False	True
T-12	WRONG_ROUTE	ALLOW	REFUSED	0	False	True
T-13	WRONG_OPERATION	ALLOW	REFUSED	0	False	True
T-14	WRONG_MOVEMENT_HASH	ALLOW	REFUSED	0	False	True
T-15	WRONG_INPUT_HASH	ALLOW	REFUSED	0	False	True
T-16	WRONG_DECISION_HASH	ALLOW	REFUSED	0	False	True
T-08	EXPIRED_GRANT	ALLOW	REFUSED	0	False	True
T-09	REVOKED_GRANT	ALLOW	REFUSED	0	False	True
T-10	CONSUMED_ONE_TIME_GRANT_REUSE	ALLOW	REFUSED	0	False	True
T-17	STALE_GRANT_AFTER_CHANGED_CONDITION	ALLOW	REFUSED	0	False	True
T-18	CONCURRENT_DUPLICATE_REQUEST	ALLOW	EXACTLY_ONE_COMMIT		True	True
T-19	DIRECT_COMMIT_HANDLER_WITHOUT_GATE	ALLOW	REFUSED	0	False	True
T-20	ALTERNATE_ROUTE_BYPASS_SURFACE	ALLOW	REFUSED	0	False	True
T-21	SAME_CONDITION_RUNTIME_REPLAY	ALLOW	COMMITTED	1	True	True
T-22	CHANGED_CONDITION_RUNTIME_REPLAY	ALLOW	FOUR_CHANGED_CONDITION_REPLAYS_EXECUTED		True	True

Longitudinal Intelligence and Learning

Semantic Curvature	INSUFFICIENT_HISTORY
Comparable observations	1
Minimum for curvature	3
Governance Spectrum	INSUFFICIENT_HISTORY
Learning signal	CANDIDATE_SIGNALS_EXPORTED_PENDING_HUMAN_REVIEW
Learning closure	PENDING_AUTHORIZED_REVIEW_CLOSURE
Live model mutation	False

Semantic Curvature remains **INSUFFICIENT_HISTORY** because this single event does not provide enough comparable finalized history. The system does not fabricate trend velocity or acceleration.

Goal 3 Completion and Pilot Evidence Boundary

Code-now completion	True
Code-now acceptance	15/15
Final-byte authority	True
Single harness	7373 passes / 0 warnings / 0 failures
Batch harness	2221 passes / 0 warnings / 0 failures
Pilot-dependent items	6
Production L5	Customer topology evidence required

Pilot-dependent evidence still requires a real connected customer topology: authorized reviewer identity/outcome closure; named production topology and non-bypassability; connected-route bypass/replay/outcome evidence; approved ROI baseline; deployment/TLS/persistence/signing evidence; and customer delegated authority/policy ownership. These are not code-now implementation defects.
