

OntoGuard Decision Authorization Packet - Sellable Lite

Public sanitized buyer summary of the latest accepted controlled run.

Protected by U.S. Patent Application 19/444,521 - Track I prioritized examination granted May 2026.

Buyer Decision Snapshot

Decision	ESCALATE
Release	WITHHELD_PENDING_REVIEW
Routed to	HUMAN_REVIEW
No-bind	NO_PROTECTED_EFFECT_FORMED
Consequence Custody	NO_BIND_PROVEN
R7 Intent Horizon	COMPUTED / distance 0.331 / WARNING_THRESHOLD_EXCEEDED
Governing Basis	ESTABLISHED_CURRENT
Lawful Continuation	INITIAL
Current event maturity	L1_PLUS_EVENT_GOVERNED_NO_BIND_PARTIAL
Controlled Full Seam	PASS - L4_ROUTE_ENFORCED - 22/22 controlled tests
Production L5	Not asserted; customer topology evidence required

What is implemented now

- One authoritative ALLOW/BLOCK/ESCALATE Decision API with frozen pre-decision input, R7 Intent Horizon, and Governing Basis Continuity.
- Source Authority, Tool Capability Authority, Evidence Custody, optional External Runtime-State Attestation, and Authority Continuity remain explicit.
- Consequence Custody binds the exact movement through decision and execution-boundary state to grant or NO-BIND proof.
- Semantic Curvature and Governance Spectrum provide bounded longitudinal intelligence and report insufficient history instead of fabricating trends.
- Review-gated learning candidates preserve the original decision; no live model, ontology, policy, benchmark, retrieval, or Decision API mutation occurs.

Evidence boundary

Goal 3 code-now is COMPLETE (15/15). The current event remains event-level/shadow proof. Separately, the 22/22 controlled fixture demonstrates L4 route enforcement only for the bounded controlled route. Production L5 requires a real customer enforcement topology.

Verification snapshot

Single post-harness	7373 passes / 0 warnings / 0 failures
Batch post-harness	2221 passes / 0 warnings / 0 failures
Learning	Review-gated candidate only; no live model mutation
